

JOIN US on Thursday, December 1

Tom Flora, Computer Science major, will talk about his internship this past summer at Trimble Navigation in Dayton, Ohio. Trimble is a leading provider of Global Positioning devices as well as surveying, construction, machine control, and agricultural tools. Among other things, the Dayton, Ohio location is home to development labs and houses the largest applications infrastructure in the organization. Tom's responsibilities included user support related tasks, documentation and hardware support.

Many of you may remember **Keith Rutkowski**, a 2003 NMU graduate (Computer Science) who is presently attending Grad School at Michigan Tech. Keith will talk about graduate classes, the types of things he is doing at Michigan Tech and how they differ from NMU, his teaching duties, and more.

Everyone is invited to attend.
There will be plenty of time for questions after each talk and refreshments will be served.

**Thursday
December 1, 2005
4:00 p.m.
