

Developing the Finn Grand Fest 2005 On-line Registration System: A Study in Programming, Volunteering, and Other Useful Arts

by

Mike Gach and John Kiltinen

The speakers will give an overview of the development of a complex on-line registration system for a many-faceted festival, Finn Grand Fest 2005. They will discuss the computer programming, and also the many other skills needed for a task of this level of complexity. The take-home lesson will be that while programming skills are needed for a project of this size, equally important are communications skills and other things one learns in one's studies, and also via volunteer experiences.
