**Statistical Methods
in Image Georectification in ArcGIS 9.0: A Review**
by
Alexandre Marti
Earth Science Major

I will be demonstrating and presenting on how the ESRI ArcGIS 9.0 software uses **statistical formulas** as tools in aiding its users in Aerial Photo Image Georectification. I will also be explaining what image Georectification is and its applications.

Living and Student Teaching in New Zealand
by
Michael Plourde
Secondary Education- Mathematics Major

I will talk about my student teaching experience in New Zealand. I'll focus on the program I was in and talk about Junior Class Learning, the organization that runs the student teaching program over there. I will also describe Macleans College where I taught for 8 weeks and discuss the similarities and differences which I saw, including the diversity and the curriculum. I plan on saying a little about living in Auckland and traveling in New Zealand.
