

Student Presentation

*Second Annual
International IT Seminar for Students*
by
Benjamin DePew and Erin Jensen

Computer Science majors Ben Depew and Erin Jensen attended the *Second Annual International IT Seminar for Students* held in Copenhagen, Denmark, as part of a CIS 497 directed study. Some of the topics/concepts discussed at the conference were: Unified Process and Extreme Programming, End-User Training, Pervasive Computing, and Software Quality and Process Improvement.

This presentation will highlight the key points of each topic covered in the seminar, as well as general information about the conference. In addition, some mention will be given to the cultural experiences and knowledge gained by attending this conference.
